

# ExcellZyme

ExcellZyme increases energy and supports the kidneys, liver, and hypothalamus.

## ONE OF THE BEST ANTIOXIDANT PRODUCTS AVAILABLE!

SUPPLEMENT FACTS		
Serving Size 2 Capsules		
Amount Per Serving		% Daily Value
Enzyme proprietary blend	78 mg	
Amylase	5,000 DU	*
Protease	7,200 HUT	*
Cellulase	400 CU	*
Lipase	24.2 LU	*
Gota Kola (herb)	300 mg	*
Rose Hips (fruit)	220 mg	*
Alfalfa Juice Conc.	150 mg	*
Ginseng (root)	150 mg	*
Gingko Biloba Leaf	50 mg	*
Gingko Biloba Leaf Extract	10 mg	*
Grape Seed Extract	40 mg	*

\*Daily Value not established

Other ingredients: Vegetarian Capsule (cellulose & water)

Enzyme activity is measured in Food Chemical Codex (FCC) units.

Store tightly in a cool, dry place. Keep out of reach of children

60 capsules per bottle. No fillers.

**Recommended Usage:** Take 2 capsules between meals three times a day as needed for energy or for balancing. ExcellZyme may also be taken with CALMZYME or PUREZYME to enhance the nervous or immune systems. For headaches/migraines, take 3 CalmZyme and 2 ExcellZyme together as needed.

ExcellZyme taken before bed may give an energy boost that would disturb sleep for the average person. People with chronic fatigue will be able to take an extra dose at bedtime along with 5 PureZyme in order to enhance the immune system.

### Indications (uses):

- Antioxidant
- Mental alertness
- Longevity
- Hypothalamus
- Liver support
- Enhance kidney
- Fatigue
- Headache/migraine
- Fainting spells
- Loss of memory
- Dizziness

### Component Benefits:

**Rose Hip** contains from ten to one hundred times more vitamin C than any other food, which is used by the body to fight bacterial infections and reduces the effects of some allergy-producing substances. Rose hip also contains vitamins A, E, B1, B2, K, Niacin, and the minerals calcium, phosphorus, and iron.

**Grape Seed Extract** is a more powerful proanthocyanadin than pine bark. The proanthocyanadins in Grape Seed Extract improve and normalize capillary activity by strengthening capillary walls. They restore flexibility to arterial walls by binding to collagen fibers, realigning them in the process to a

more youthful, undamaged structure. Thus, elasticity and strength are restored to all connective tissue.

The proanthocyanadins scavenge free radicals and inhibit decarboxylase in the anti-inflammatory process, thereby reducing inflammation. Inhibiting histamine decarboxylase also decreases the amount of histamine released in allergic reactions, thus reducing the severity of allergic responses.

According to "Advances in Nutritional Science," the benefits of proanthocyanadins include protection from aging, improved vision, reduced wrinkling of the skin, reduced risk of heart disease, enhanced immunity, subdued PMS, reduced inflammation in arthritis, improved circulation, resistance to bruising, improved flexibility, and reduced fatigue.

Teamed with the pure plant enzymes that deliver the nutrients listed above and the herbs listed below, these two ingredients in ExcellZyme constitute a complete nutritional food for the whole body.

**Gota Kola** works in a unique way to improve memory and to overcome brain fatigue. It is invaluable as a brain food and as an excellent natural neural tonic that slowly builds mental stamina and neural health. According to Asian and European practice, Gota Kola is an excellent blood purifier, glandular tonic, and diuretic. It is known in India as the longevity herb.

**Alfalfa** is one of the best sources of vitamin and mineral herbs. It is 34.9 percent calcium and has sufficient Vitamin D, phosphorus, and magnesium to make calcium usable in the body. High in natural iron, potassium, chlorine, sodium, and silicone, it is enhanced by vitamin E, A, B12, and even B6. Alfalfa is also the natural hormone for the pituitary gland.

**Siberian Ginseng** is the famous Asiatic tonic that has been shown in numerous studies to affect mental and physical behavior. In geriatric use, Ginseng has been proven beneficial for restoring mental abilities. Ginseng helps by directly affecting the adrenal-pituitary axis. This is most often manifested as an increased resistance to the effects of stress. The herb also aids mental function by improving circulation. Studies have demonstrated Ginseng's ability to assist learning.

**Gingko Biloba** has only been in use since 1988. Scientific research shows it to be another preventive medicine. It is able to work on the nerve centers, to increase brain circulation, and to generally reactivate the well-being of the body. Testing has shown Gingko to be a remarkable inhibitor of the lipid peroxidation of membranes (membrane penetration), and it is widely used in products to deliver oxygen to the brain via the blood system. Studies also show it to be a longevity aid. ExcellZyme contains both the leaf and the extract, making it one of the finest formulations available.
